1

Match the board pieces to the numbers on the board image above to find your first two pieces.

2

Pop out only these puzzle pieces from the board.

3

To put the two pieces together, match up the slots on each piece. Slide together.

4

Continue assembling by putting pieces together in numerical order.

5

6

Push piece 5 until it clicks in place. If it doesn't seem to be attaching to the model, go back and make sure the open notches are completely lined up.

7

8

9

10

There should be two open sections without panels on each side of the model. You'll build those later.

11

12

Pay special attention to the way the model is facing. If you put the panel in the wrong place, the rest of the model won't come together.
